Company Profile

公司簡介

Solargiga Energy Holdings Limited (the “Company”, together with its subsidiaries collectively the “Group”, stock code: 757) is a leading manufacturer of monocrystalline silicon solar ingots and wafers in the People’s Republic of China (“PRC”). Its products are used for the manufacture of photovoltaic (“PV”) cells which are important components of solar energy generation systems. It is engaged in three main businesses:

Chairman's Statement

主席報告書

In 2008, measures such as raising funds through the Listing, increasing production capacity and enhancing level of technology, have created favourable opportunities for the Group's business development. However, at the same time, the impacts of the global financial tsunami have also brought a very challenging business environment for the solar power industry, which still needs subsidies from the government. Currently, governments from various countries are having a tough time in dealing with serious problems such as deflation, aggravation of economy and rise of unemployment rate. However,

In a market environment surrounded with both opportunities and challenges, the Group's most valuable assets are its loyal, devoted and outstanding staff. I, on behalf of the Board of Directors, would like to express our gratitude to the staff from all departments for their dedicated services and contributions, as well as to all shareholders and business partners for their continuous support and trust.

The substantial decreases in prices of raw material, polysilicon, and finished products provide the industry with an opportunity of consolidation and is beneficial to the medium to long-term development of the solar energy industry. The Group will seize the market opportunities and enhance its competitive advantages and operational efficiency, so as to strengthen its market position, in an effort to capture the rapid growth of the solar energy products.

Business Review 業務回顧

Solargiga was successfully listed on the Main Board of the Stock Exchange on 31 March 2008. The proceeds raised from the Listing have accelerated the expansion of production capacity and enhanced the level of technology, provided a strong support for its development in the long run. It also laid a solid foundation for the Group to expand across the globe. Moreover, the Group was included as a constituent stock for the MSCI Global Small Cap Index on 25 November 2008, further enhancing the Group's status on the international capital market and recognising its achievement in the market.

In 2008, capitalising on its leading research and development ("R&D") standard and its strengths in the markets, the Group continued to be a leading manufacturer of monocrystalline silicon solar ingots and wafers. During the fourth quarter of 2008, the players of all industries faced enormous challenges with the downturn of global economies. The prices of upstream raw materials and downstream products in the solar energy industry were under pressure. Shortly after 31 December 2008, a continuous and more severe drop in the overall raw material and product pricing was observed. The Board, after discussion with the auditors of the Company in relation to the accounting treatment of diminution of value of inventories as at 31 December 2008, considered that such diminution would have a material adverse impact on the Group's full-year 2008 results and an early alert to investors was warranted by issuing the profit warning announcement dated 5 February 2009 in a timely manner. Nonetheless, the financial position of the Group has remained healthy. In addition, the Group has proactively addressed the impacts of the global financial tsunami by implementing stringent cost control measures, enhancing production efficiency, as well as adjusting its development strategies and product portfolio to cope with the market demands. The Group, therefore, is confident that the current difficulties may be overcome.

According to the data from the "World Energy Outlook 2008" published by the International Energy Agency, the demand for global primary energy in 2030 is expected to grow by 45% over that of 2006. It is also expected that renewable energy would develop rapidly and would overtake natural gas soon after 2010 to become the second largest electricity fuel, next to coal. Non-hydroelectric renewable energies such as solar energy and wind energy are expected to achieve an average growth rate of 7.2% per year from 2006 to 2030, exceeding the average growth rate of any other energy globally.

The reserves of fossil energy are limited and will be exhausted one day. The existing energy reserves are diminishing, and the unreasonable and excessive use of fossil energy has caused serious pollution to the environment. In order to maintain sufficient energy supply and to realise the sustainable development of energy and environment, governments of various countries have proactively promoted the development of renewable energy industries, in which solar energy is considered the preferred choice for clean energy due to its wide applications, easy installation and infinite nature. These factors have continuously contributed to the rapid growth of the solar energy industry worldwide.

In respect of the global PV markets, countries including Japan, Germany, Spain and Italy are currently the major end-markets. These countries are promoting solar generation by implementing proactive policies, such as government grants, leading to the fast development of the PV manufacturing industry. The PRC and the United States, being the largest energy consuming countries in the world, together with Greece, France, Australia and the Middle East are promising solar energy markets with substantial potential in the future.

At present, the suppliers of polysilicon, a major raw material for the Group, are mainly from countries in Europe, the United States and Japan. In recent years, the rapid growth of the solar energy industry has resulted in a serious shortage of polysilicon supply due to insufficient output. With inadequate supply, the price of polysilicon has been increasing. With effect from the fourth quarter of 2008, as the financial tsunami triggered the economic slowdown, some manufacturers of solar energy products have experienced capital shortages, which resulted in a drop in demand for polysilicon and prices continued to fall substantially. In the long run, it is expected that the supply of the raw material, polysilicon, will only become stable upon the completion of the expansion plans of existing polysilicon manufacturers and the introduction of new manufacturers in Japan, Korea and the PRC. By then, the solar energy industry is expected to grow steadily and healthily.

Enhancing production capacity to address market demands

In recent years, with the increasing awareness of environmental protection, global warming has become a worldwide issue. Owing to the fact that fossil fuel will be used up one day, there is a huge market potential for renewable energy due to its unlimited and infinite natures. According to the "Research Report on the Development of the Photovoltaic Industry in China (2006-2007)"

Regarding the Japanese market, the Japanese government announced in the first quarter of 2009 that the subsidies for household solar energy generation systems were open for application with a budget up to 9 billion Yen. It also plans to have over 70% of newly built houses throughout the nation to be equipped with a solar energy generation system, so that the wattage of solar-generated energy will be increased by 10 times from that of at present, with the goal of a further growth of 40 times in 2030. It also plans to reduce the emission of the greenhouse gas to a rate of between 60% and 80% of that in 1990 by 2050.

In view of the rapid economic growth in the PRC, the number of industrial and infrastructure projects keeps increasing, driving the demand for energy. In addition, as the environmental protection policies in the PRC aim at aligning with the international ones, it has created tremendous opportunities for the solar energy industry. The PRC government has earlier approved three pilot projects of solar energy power stations, namely the Chongming Island (崇明島) project in Shanghai for 1MW of power, the Ordos (鄂爾多斯) project in the Inner Mongolia for 255KW of power and the Dunhuang ()

Proactively enhancing production capacity and expanding product range

To cope with the need for future development, the Group will complete the construction of a new production plant which can accommodate 200 monocrystalline silicon ingot pullers and 43 wiresaws. The installation of monocrystalline silicon ingot pullers is expected to commence in the fourth quarter of 2009 and their commercial production will start upon the completion of installation and testing by the end of the fourth quarter of 2009. Wiresaws will be delivered in batches to the plant and the installation and production will start from the end of the second quarter of 2009 and full production is expected to commence in the fourth quarter of 2009. According to such plan, in 2009, the numbers of monocrystalline silicon ingot pullers and wiresaws will be increased to 400 and 80 respectively, the annual production capacity of silicon ingots and wafers will rise to 4,000 tonnes and 150 million pieces respectively, with the annual solar energy conversion capability increased to 400MW.

The Group plans to expand its product range according to requirements of existing customers. Capitalising on its advanced technologies, the Group has participated in the manufacture of multicrystalline silicon solar ingots and wafers, achieving the target of becoming one of the major manufacturers of multicrystalline silicon solar ingots and wafers. Currently, there are four multicrystalline silicon ingot casting furnaces under installation and fine-tuning, which will duly come into operation once the testing is completed.

The capital required for such expansion of production capacity will be satisfied by the proceeds from the Listing, internal resources and/or other sources of long-term financing. On the other hand, to comply with the policies of the PRC government for the promotion of solar energy industry, the Group will accelerate its pace of development in the PRC market. Aside from consolidating its existing customers from both the PRC and abroad, the Group is actively expanding its sales network to further increase its market share of the solar energy industry.

Enhancing the R&D investment to strengthen its leading position

The Group's ability to obtain a leading position in the industry of manufacturing monocrystalline solar ingots is attributable to its high level of R&D capability. In the future, the Group will continue to optimise its ability of reclaiming and improving ingot crystallisation, wafer slicing and polysilicon. The Group will enhance the production efficiency and reduce the operating costs through the introduction of the latest technologies. At the same time, the Group will continue to upgrade the slicing technology and to study and develop the production of thinner and larger wafers. The target is set to produce monocrystalline wafers of 150 μ m of thickness. The Group will also fulfill customers' specific requirements by developing wafers which can be used for the production of solar cells with higher conversion efficiency which in turn can be used for the production of modules of higher wattage output. Besides, 40 monocrystalline silicon ingot pullers with magnetic field will be delivered by the end of the fourth quarter of 2009, and the production will commence upon installation and fine-tuning.

Enhancing the R&D investment to strengthen its leading position (Continued)

The Group will also continue to reinforce the cooperation with academic institutions. The research centre jointly established with Dalian University of Technology will be completed in the third quarter of 2009 and will possess world-class technology level. It will facilitate the nurturing of R&D technicians and the development of new products and technologies.

Exploring diversified channels to stabilise the supply of raw materials

During the fourth quarter of 2008, the price of polysilicon raw materials decreased along with a drop in demand resulting from global economic slowdown. However, management believes that securing the stable price and supply of raw materials is beneficial to the long-term development of the Group. Therefore, apart from its strategic investment partners, the Group will actively seek new suppliers for quality raw materials, and to enter into medium to long-term supply agreements with them when the timing is right, in order to satisfy part of the production capacity.

On the other hand, the Group continues to blend in more lower-grade polysilicon leftovers in the production of silicon ingots and wafers, so as to study the feasibility of using metallurgical silicon in the production of monocrystalline solar ingots, in an attempt to diversify the sources for materials and reduce the risks of unstable supply and price fluctuation of raw materials.

The slowdown of the global economies has caused a drop in the demand for energy in the market, and a decline in the price of crude oil has lowered the urge for the development of the new energy industry. However, management believes the unfavourable market is to be a short-term periodic phenomenon which provides the industry with an opportunity of consolidation and is beneficial to the medium to long term development of the solar energy industry. Looking forward, the Group will adopt a prudent strategy for development, which will be adjusted in accordance with market changes. Leveraging on its solid foundation of business operations and financial position, the Group will be able to grasp the market opportunities while progressing forward, generating the best return for the shareholders.

Management Discussion and Analysis

管理層討論及分析

The Group's turnover increased year-on-year by 47.0%, from RMB1,015.5 million in 2007 to RMB1,492.9 million in 2008. The increase was mainly driven by the new production capacity which commenced operation in 2008 as well as the continuous increasing in the market prices of solar products in the first nine months of 2008.

1. Sales of monocrystalline silicon ingots and wafers increased by 42.1% from RMB864.7 million to RMB1,229.0 million. This is attributable to both increases in sales volume and average selling prices in the first nine months of 2008. The volume of ingot sold decreased from 150,837 kg in 2007 to 105,124 kg in 2008, while volume of wafers sold increased from 14.6 million pieces to 21.9 million pieces.
2. Revenue from processing service fees increased from RMB109.6 million to RMB113.3 million. The volume of ingots processed decreased from 424,920 kg in 2007 to 225,886 kg in 2008 while the volume of wafers processed increased from 1,239,896 pieces in 2007 to 1,326,888 pieces in 2008.
3. Sales of upgrading polysilicon increased by 285.5% from RMB41.2 million to RMB150.6 million. The Group purchases scrap polysilicon and resells to third parties after upgrading thereof.

營業額

本集團的營業額由二零零七年的人民幣1,015,500,000元增至二零零八年的人民幣1,492,900,000元，按年增長47.0%。營業額的增加主要由於新產能於二零零八年開始投產，加上二零零八年首九個月太陽能產品的市價持續上升所帶動。

1. 單晶硅錠及硅片的銷售額由人民幣864,700,000元增至人民幣1,229,000,000元，上升42.1%，由於二零零八年首九個月的銷量及平均售價增加所致。硅錠的銷量由二零零七年150,837公斤減至二零零八年105,124公斤，硅片的銷售則由14,600,000片增至21,900,000片。
2. 來自加工服務費的收入由人民幣109,600,000元上升至人民幣113,300,000元。硅錠的加工量由二零零七年424,920公斤減至二零零八年225,886公斤，而硅片的加工量則由二零零七年1,239,896片增至二零零八年1,326,888片。

In terms of geographical contribution, sales were mainly generated from the PRC, increased considerably by 199.6% to RMB1,116.5 million and accounted for 74.8% of the Group's turnover. The increase is mainly attributable to the adjustment of sales strategy by selling more products and providing more processing services to high quality customers in the PRC in order to capitalise the benefit from the appreciation of RMB as well as reduce the impact on the change of the export tax refund policies imposed on the export of ingots and wafers. The remaining sales were generated from Taiwan(12.9%), Japan(9.9%), Europe(1.4%), North America(0.8%) and others(0.2%).

Cost of sales increased by 83.0%, from RMB692.4 million to RMB1,267.4 million. During the year and before being affected by the global financial crisis, the price of polysilicon was in a continuous increasing trend. The increase in cost of sales was thus in line with the increase in turnover and reflected the increase in the price of polysilicon. As a consequence of the negative impact on the solar energy industry, the prices of raw material prices declined gradually, and it led

The inventories of the Group mainly comprised raw materials (namely polysilicon, crucibles and other auxiliary raw materials) and finished goods. The increase in inventories was mainly due to the expansion in the production capacity of the Group. Included in the balance of the inventories as at 31 December 2008 was a write-down of inventories of RMB220.2 million (2007: Nil). This is mainly due to the continuous fall in the prices of raw material and product selling prices caused by the global economic slowdown. The inventory turnover days as at 31 December 2008 totalled 77 days (2007: 77 days). The Directors consider the Group's optimal inventory level should be around three months for polysilicon and one month for other auxiliary raw materials to meet the Group's production requirements.

The trade receivable turnover days as at 31 December 2008 totalled 23 days (2007: 31 days).

The Directors considered such turnover days was at low level and was within the credit periods of the Group grants to its customers. The Group normally grants a credit period of 30 to 90 days to its customers.

The trade payable turnover days as at 31 December 2008 totalled 26 days (2007: 24 days).

Given the established relationship, suppliers allowed the Group to have a reasonable payment period throughout the year.

The Group's principal sources of working capital included cash flow from operating activities, bank and other borrowings and the proceeds from the

Corporate Governance Report

企業管治報告

The Board strived to uphold good corporate governance and adopted sound corporate governance practices. This report outlines the principles and the code provisions of the Code on Corporate Governance Practices (the "Code") contained in Appendix 14 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("Listing Rules") which have been adopted by the Group.

The Company has established the audit committee (the "Audit Committee") in compliance with the Code to oversee the financial reporting procedures and internal controls of the Group so as to ensure compliance with the Listing Rules. The Company has also established a nomination committee (the "Nomination Committee") and a remuneration committee (the "Remuneration Committee") (collectively, the "Board Committees") with defined terms of reference. The terms of reference of the Board Committees are available upon request.

Despite the removal of the requirement for a qualified accountant in the Listing Rules effective 1 January 2009, the Group continues to maintain the post of a qualified accountant to oversee its financial reporting and other accounting-related issues in accordance with the relevant laws, rules and regulations.

The Group has implemented a compliance manual which covers areas such as ongoing compliance obligations of the Company and the Directors, business operations of the Group, financial management systems, human resources management systems, internal control systems, quality assurance and property management systems. Since the Listing of the shares of the Company on the Main Board of the Stock Exchange on 31 March 2008, all the code provisions set out in the Code were met by the Company.

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") as set out in Appendix 10 of the Listing Rules as the standard for securities transactions entered into by Directors. The Company has made specific enquiries of all the Directors and all the Directors confirmed that they have complied with the required standards as set out in the Model Code and its code of conduct regarding Directors' securities transactions since the Listing on 31 March 2008.

B

The Board takes the responsibility to oversee all major matters of the Company, including the formulation and approval of overall business strategies, internal control and risk management systems, and monitoring the performance of the senior management. The Directors have the responsibility to act objectively in the interests of the Company.

Supply of graphite materials by 錦州昌華碳素制品有限公司 (Jinzhou Changhua Carbon Products Company Limited*) ("Jinzhou Changhua") and supply of quartz crucibles by 錦州佑鑫電子材料有限公司 (Jinzhou Youxin Electronic Materials Co., Ltd.*) ("Jinzhou Youxin")

On 12 January 2008, the Company entered into a framework supply agreement with Jinzhou Changhua and Jinzhou Youxin (the "Supply Agreement") pursuant to which Jinzhou Changhua and Jinzhou Youxin have agreed to supply graphite materials and quartz crucibles respectively to the Company or its subsidiaries as requested by them from time to time. Such graphite materials and quartz crucibles serve as the Group's raw materials for the production of ingots. The Supply Agreement has become effective on 31 March 2008 and will expire on 31 December 2009. Formal purchase agreements (by way of purchase orders and confirmations) are to be entered into between the Group, Jinzhou Changhua and Jinzhou Youxin (as the case may be) with the detailed terms and conditions as specified in the relevant purchase orders. The purchase arrangement under the Supply Agreement has been conducted on normal commercial terms and on terms no less favourable than those available from independent third parties.

The Supply Agreement was entered into in the ordinary and usual course of business of the Group and on normal commercial terms. The purchase price payable by the Group to Jinzhou Changhua and Jinzhou Youxin (as the case may be) under the Supply Agreement is estimated based on the expected purchase amount of the graphite materials and quartz crucibles and is comparable to the prevailing market prices.

For the year ended 31 December 2008, the aggregate amount of the purchase price paid by the Group to Jinzhou Changhua in relation to the sale and purchase of graphite materials amounted to approximately RMB27,005,000 (2007: RMB16,873,000).

For the year ended 31 December 2008, the aggregate amount of the purchase price paid by the Group to Jinzhou Youxin for the purchase of quartz crucibles amounted to approximately RMB24,850,000 (2007: RMB29,504,000).

Supply of graphite materials by Jinzhou Changhua and supply of quartz crucibles by Jinzhou Youxin (Continued)

Based on the Directors' estimate of the purchase of graphite materials and quartz crucibles for the year ending 31 December 2009, it is expected that the annual cap amount payable by the Group for transactions under the Supply Agreement will not exceed RMB185,177,000.

The above proposed cap is determined with reference to (a) the Group's expected production capacity (with the Group's ingot production facilities of 196 ingot pullers and 37 wafer wiresaws; and (b) the expected increase in the unit cost of graphite materials and quartz crucibles resulting from the increase in the size of the quartz crucible from 18 inches to 20 inches in diameter where a large portion of such modification work for the Group's ingots facilities will be carried out in 2009. The increase in size of the quartz crucible from 18 inches to 20 inches in diameter for the Group's ingot production facilities allows the Group to produce better quality of ingots as well as with longer length for each ingot produced from the ingots puller.

按照董事估計截至二零零九年十二月三十一日止年度採購石墨材料及石英坩堝的數量，預期本集團根據供應協議項下交易應付年度上限金額不會超過人民幣185,177,000元。

上述建議上限乃參考(a)本集團的預期產量(本集團的硅錠生產設施包括196台硅錠拉製機及37台硅片線鋸);及(b)石英坩堝的尺寸由直徑18吋增加至20吋所導致石墨材料及石英坩堝的單位成本的預期增幅，而本集團硅錠設施的大部分優化工程將於二零零九年進行。本集團硅錠生產設施的石英坩堝的直徑由18吋增加至20吋後，不但可讓本集團生產更高質量的硅錠，更可使硅錠拉製機生產的每個硅錠俾予留捷木吨

Supply of scrap polysilicon, scrap ingots and scrap wafers by WWX

On 12 January 2008, the Company entered into a framework supply agreement with WWX (the "WWX Supply Agreement") pursuant to which WWX agreed to supply, and/or procure its subsidiaries ("WWX Group") to supply scrap polysilicon raw material, scrap ingots and scrap wafers to the Company or its subsidiaries as requested by them from time to time. Such scrap polysilicon, scrap ingots and scrap wafers serve as the Group's raw materials for its production of wafers. The term of the WWX Supply Agreement has become effective on 31 March 2008 and expire on 31 December 2009. Formal purchase agreements (by way of purchase orders and confirmations) are to be entered into between the Company (and/or its subsidiaries) and WWX (and/or its subsidiaries) with the detailed terms and conditions as specified in the relevant purchase orders. The purchase arrangement under the WWX Supply Agreement is conducted on normal commercial terms and is on terms no less favourable than those available from independent third parties.

The WWX Supply Agreement was entered into in the ordinary and usual course of business and on normal commercial terms. The purchase price payable by the Group to WWX under the WWX Supply Agreement is estimated based on the expected purchase amount of the scrap polysilicon, scrap ingots and scrap wafers and is comparable to the prevailing market prices in the scrap polysilicon, scrap ingots and scrap wafers market in the PRC.

On 4 June 2008, the Company has announced its intention to revise the caps for the transactions under the WWX Supply Agreement as well as to determine the annual cap for the transactions for the year ending 31 December 2010 by means of signing of a supplemental supply agreement ("WWX Supplemental Supply Agreement"). The Company has obtained the approval from its independent shareholders on 27 June 2008. Upon approval, the terms of the WWX Supplemental Supply Agreement have become effective on 27 June 2008 and will expire on 31 December 2010.

For the year ended 31 December 2008, the aggregate amount of the purchase price paid by the Group to WWX Group in relation to the supply of scrap polysilicon raw material, scrap ingots and scrap wafers amounted to approximately RMB214,739,000 (2007: RMB36,027,000).

Supply of scrap polysilicon, scrap ingots and scrap wafers by WWX (Continued)

Based on the Directors' estimate of the purchase of scrap polysilicon, scrap ingots and scrap wafers in the coming two years, it is expected that the following annual cap amounts payable by the Group for transactions under the WWX Supply Agreement will not exceed:

- (a) RMB675,854,000 for the year ending 31 December 2009; and
- (b) RMB790,749,000 for the year ending 31 December 2010.

The above proposed caps are determined with reference to the Group's expected increase in production (with the Group's ingot production facilities to increase from 196 ingot pullers at present to 400 by the end of 2009) and thus the increase in demand for scrap polysilicon, scrap ingots and scrap wafers for the production requirements of the Group resulting therefrom. These caps are also determined after discussion between the Group and WWX in terms of its expected production of scrap polysilicon, scrap ingots and scrap wafers generated through its semi-conductor manufacturing process.

WWX holds 100% interests in Wafer Works Investment Corp. ("WWIC"). WWIC is a substantial shareholder of the Company. Each of WWX and its subsidiaries is therefore an associate of WWIC and hence a connected person of the Company. Consequently, the transactions under the WWX Supply Agreement and WWX Supplemental Supply Agreement constitute non-exempt continuing connected transactions for the Company under Rule 14A.35 of the Listing Rules.

Sale of upgraded and processed polysilicon, solar ingots and solar wafers to WWX (Continued)

The WWX Sale Agreement was entered in the ordinary and usual course of business and on normal commercial terms. The purchase price payable by WWX to the Group under the WWX Sale Agreement is determined with reference to the prevailing market price of upgraded and processed polysilicon, solar ingots and solar wafers.

On 4 June 2008, the Company has announced its intention to revise the caps for the transactions under the WWX Sale Agreement as well as to determine the annual cap for the transactions for the year ending 31 December 2010 by means of signing of a supplemental sale agreement ("WWX Supplemental Sale Agreement"). The Company has obtained the approval from its independent shareholders on 27 June 2008. Upon approval, the terms of the WWX Supplemental Sale Agreement have become effective on 27 June 2008 and will expire on 31 December 2010.

For the year ended 31 December 2008, the aggregate amount of the sales proceeds received by the Group from WWX Group in relation to the sale of upgraded and processed polysilicon, solar ingot and solar wafers amounted to approximately RMB190,002,000 (2007: RMB179,690,000).

Based on the Directors' estimate of the sales of upgraded and processed polysilicon, solar ingots and solar wafers in the coming two years, it is expected that the following annual cap amounts receivable by the Group for transactions under the WWX Sale Agreement will not exceed:

(a) RMB361,556,000 for the year ending 31 December 2009; and

(b) RMB423,021,000 for the year ending 31 December 2010.

The Directors believe that WWX Group has been purchasing from the Group, mainly due to the Group's product quality and reliability. Sales of upgraded and processed polysilicon, solar ingots and solar wafers to WWX and its subsidiaries have increased over time and the above proposed caps are determined with reference to (a) the Group's expected increase in production capacity (with the Group's ingots production facilities expected to increase from 196 ingots pullers at present to 400 by the end of 2009) and (b) the increase in sales to WWX resulting from the expected increase in demand for solar based products in Taiwan.

The above proposed cap is determined with reference to (a) the Group's expected increase in processing capacity (with the Group's ingot production facilities of 196 ingot pullers and 37 wafer wiresaws) and (b) the increase in WWX's demand for recycled polysilicon materials required for its semi-conductor production. As recycled polysilicon is a cheaper source of polysilicon raw material for semi-conductor production, WWX may seek to use a greater portion of the recycled polysilicon for its semi-conductor production.

As mentioned in the paragraph headed "Supply of scrap polysilicon, scrap ingots and scrap wafers by WWX" above, WWX is a connected person of the Company. Sale of solar wafers to 錦州華昌光伏科技有限公司 Jinzhou Huachang Photovoltaic Technology Co., Ltd. ("Huachang Guangfu")*

On 12 August 2008, the Company entered into a framework sale agreement with Huachang Guangfu ("Huachang Guangfu Sale Agreement") pursuant to which the Company has agreed to sell, or procure its subsidiaries to sell solar wafers to Huachang Guangfu and/or its subsidiaries ("Huachang Guangfu Group"). Upon the approval from the independent shareholders on 7 November 2008, the Huachang Guangfu Sale Agreement has become effective and will expire on 31 December 2010. The above proposed caps are determined with reference to (a) the actual quantity of abrasives and mineral oil used by the Group in the first half of 2008; (b) the anticipated increase in solar wafer production arising from an expansion in the Group's manufacturing bases which is, subject to the prevailing market conditions, expected to reach 150 million pieces of solar wafer by end of 2009; (c) the anticipated quantity of recycled abrasives and mineral oil to be obtained by the Group; and (d) the projected processing fee of recycled abrasives and mineral oil in the next two financial years.

Jinzhou Aoke, a company incorporated in the PRC, is owned as to 35% by Jinzhou Yuexin, which is wholly-owned by Mr. TAN Wenhua; and as to 65% by independent third parties. Jinzhou Aoke is therefore an associate of Mr. TAN Wenhua and hence a connected person of the Company. Consequently, the transactions under the Jinzhou Aoke Processing Agreement constitute non-exempt continuing connected transactions for the Company under Rule 14A.35 of the Listing Rules.

The transactions as set out in section (A) "Continuing Connected Transactions Exempt from the Independent Shareholders' Approval Requirements" above constitute continuing connected transactions of the Group which are exempt from independent shareholders' approval under Rule 14A.34 of the Listing Rules and are subject to the reporting and announcement requirements set out in Rule 14A.35(3) of the Listing Rules. The transactions as set out in section (B) "Non-exempt Continuing Connected Transactions" above are subject to announcement and independent shareholders' approval requirements set out in Rules 14A.47 to 14A.48 of the Listing Rules.

The Board has reviewed and the Independent Non-executive Directors have confirmed that the above continuing connected transactions (the "Continuing Connected Transactions") for the year ended 31 December 2008 were entered into and conducted:

- (i) in the ordinary and usual course of business of the Company;
- (ii) either on normal commercial terms or terms no less favourable to the Company than terms available to or from independent third parties; and
- (iii) in accordance with the relevant agreement governing them and the terms and the proposal annual caps set out above that are fair and reasonable and in the interests of the shareholders of the Company as a whole.

上述建議上限乃參考(a)本集團於二零零八年上半年所使用切割砂及切割液的實際數量；(b)生產太陽能硅片因本集團擴充製造基地預期取得的增幅，須視乎當時市況而定，預期於二零零九年底可達150,000,000片太陽能硅片；(c)本集團將獲得循環再用切割砂及切割液的預期數量；及(d)於隨後兩個財政年度循環再用切割砂及切割液的預期加工費釐定。

Pursuant to Rule 14A.38 of the Listing Rules, the Board engaged, KPMG, the auditors of the Company to perform the agreed upon procedures on the Continuing Connected Transactions which:

- (i) have received the approval from the Board;
- (ii) are in accordance with the pricing policies of the Company;
- (iii) have been entered into in accordance with the terms of the agreements governing such Continuing Connected Transactions; and
- (iv) have not exceeded the caps disclosed in the relevant announcements.

The auditors have confirmed to the Board in writing in respect of the Continuing Connected Transactions for the year ended 31 December 2008 that the Continuing Connected Transactions:

- (i) have received the approval of the Board of Directors;
- (ii) were entered in accordance with the pricing terms set out in the relevant agreements governing such transactions;
- (iii) were recorded in agreements governing the Continuing Connected Transactions; and
- (iv) the aggregate dollar amount of the Continuing Connected Transactions did not exceed the cap amounts disclosed in the relevant announcements of the Company in respect of each of the Continuing Connected Transaction.

不獲豁免的持續關連交易 (續)

根據上市規則第14A.38條，董事會委聘本公司的核數師畢馬威會計師事務所就以下持續關連交易履行協定的程序：

- (i)

The Company has conditionally approved and adopted the share option scheme on 27 February 2008 ("Share Option Scheme") in which certain participants may be granted options to subscribe for the ordinary shares in the share capital of the Company with a nominal value of HK\$0.10 each ("Shares"). The Directors believe that the Share Option Scheme will be important for the recruitment and retention of quality executives and employees.

The subscription price for the shares under the option to be granted will be determined by the Board and will be the highest of:

- (i) the official closing price of the Shares as stated in the Stock Exchange's daily quotation sheets on the date of grant, which must be a day on which the Stock Exchange is open for the business of dealing in securities;
- (ii) the average of the official closing prices of the Shares as stated in the Stock Exchange's daily quotation sheets for the five business days immediately preceding the date of grant; and
- (iii) the nominal value of a Share.

The maximum number of Shares in respect of which options may be granted under the Share Option Scheme and under any other share option schemes of the Company must not in aggregate exceed 10% of the total number of Shares in issue immediately following completion of the Listing (but taking no account of any Shares which may be sold pursuant to the exercise of the over-allotment option in connection with the Listing) and capitalisation issue, being 169,076,650 Shares.

The total number of securities available for issue under the Share Option Scheme as at 31 December 2008 was 126,807,487 Shares (after the grant of options to subscribe for 42,269,163 Shares).

No option may be granted to any person such that the total number of Shares of the Company issued and to be issued upon exercise of all options granted and to be granted to each participant in any 12-month period up to the date of the latest grant exceeds 1% of the number of Shares of the Company in issue.

An option may be exercised in accordance with the terms of the Share Option Scheme at any time during a period as determined by the Board of Directors of the Company, which must not be more than 10 years from the date of the grant.

At 31 December 2008, each of the Directors and employees of the Company had the following interests in options to subscribe for Shares (market value per share at 31 December 2008 was HK\$1.96) granted for a consideration of HK\$1.00 under the Share Option Scheme. The options are unlisted. Each option gives the holder the right to subscribe for one ordinary share of HK\$0.10 each of the Company.

購股權計劃

本公司已於二零零八年二月二十七日有條件批准及採納購股權計劃(「購股權計劃」),若干參與者可能獲授購股權認購本公司股本中每股面值0.10港元之普通股(「股份」)。董事相信購股權計劃對聘用及留聘高質素的行政人員及僱員至為重要。

董事會釐定將予授出購股權所涉及股份的認購價,並將以下列最高者為準:

- (i) 股份於授出日期(須為聯交所關於進行證券交易業務的日子)於聯交所每日報價表所報的正式收市價;
- (ii) 緊接授出日期前五個營業日股份於聯交所每日報價表所報正式收市價平均數;及
- (iii) 股份面值。

根據購股權計劃及本公司任何其他購股權計劃可能授出的購股權涉及的股份數目上限,合共不得超過緊隨上市(但並不計及根據有關上市之超額配股權獲行使而可能出售的任何股份)及資本化發行完成後已發行股份總數的10%,即169,076,650股股份。

截至二零零八年十二月三十一日,於購股權計劃項下可發行證券總數為126,807,487股股份(授出可認購42,269,163股股份之購股權後)。

本公司不得向任何人士授出購股權,致使該名人士在截至最後授出日期止任何12個月期間內已獲授或將獲授之購股權於行使時所發行及可予發行之本公司股份總數,超過本公司已發行股份1%。

Report of the Directors

董事會報告書

-

The Directors confirm that they have no interest in any business (apart from the Group's business) which competes or is likely to compete, either directly or indirectly, with the Group's business. The Directors have also signed a non-competition undertaking with the Company.

-

There are no provisions for pre-emptive rights under the Company's articles of association, or the law of Cayman Islands, being the jurisdiction in which the Company is incorporated under which would oblige the Company to offer new Shares on a pro-rata basis to existing shareholders.

The Company has adopted the Model Code as set out in Appendix 10 of the Listing Rules as the code of conduct regarding securities transactions by the Directors. Special enquiries have been made by the Company to confirm that all Directors have been complied with the Model Code for the year ended 31 December 2008.

Principal corporate governance practices adopted by the Company are set out in the corporate governance report on pages 25 to 31.

A

The Company established an Audit Committee on 27 February 2008 with terms of references adopted on 20 March 2007 in compliance with the Code set out in Appendix 14 of the Listing Rules. The members of the Audit Committee are the four independent non-executive Directors, and Mr. Chong Kin Ngai, a non-executive Director and Mr. Wong Wing Kuen Albert, an independent non-executive Director, is the Chairman of the Audit Committee.

The Audit Committee is to serve as a focal point for communication between other Directors, the external auditor and the internal auditor (where an internal audit function exists) of the Company as regards their duties relating to financial and other reporting, internal controls, external and internal audits and such other financial and accounting matters as the Board determines from time to time.

The audit committee is to assist the Board in providing an independent review of the effectiveness of the financial reporting process, internal control and risk management system of the Group, overseeing the audit process and performing other duties and responsibilities as may be assigned by the Board from time to time. The audit committee has reviewed the Group's interim and annual consolidated financial statements for the year 2008, including the accounting principles and practices adopted by the Group.

優先購股權

本公司之組織章程細則或開曼群島(即本公司註冊成立的司法權區)法例均無有關優先購股權之條文,規定本公司須按持股比例向現有股東提呈新股。

董事進行證券交易的標準守則

本公司已採納上市規則附錄十所載標準守則作為其本身董事進行證券交易的操守守則。本公司特別就此作出查詢後確認,全體董事截至二零零八年十二月三十一日止年度已遵守標準守則。

企業管治

本公司採納的主要企業管治常規,載於第25至31頁的企業管治報告。

審核委員會

本公司於二零零八年二月二十七日成立審核委員會,並於二零零七年三月二十日採納按照上市規則附錄十四所載列守則制定的職權範圍。審核委員會由四名獨立非執行董事及非執行董事莊堅毅先生組成,獨立非執行董事王永權先生為審核委員會主席。

審核委員會乃作為其他董事、外聘核數師與內部核數師(倘存在內部審核職能)之間的溝通橋樑,關乎彼等職責中相關的財務及其他報告、內部監控、外部及內部審核以及董事會不時決定的其他財務及會計事宜。

審核委員會乃為協助董事會獨立檢討財務報告過程、內部監控及風險管理制度的成效、監管審核過程及履行董事會不時指派的其他職責及責任。審核委員會已審閱本集團截至二零零八年度中期及年度綜合財務報表,包括本集團採納的會計原則及常規。

(c) Basis of preparation (continued)

The consolidated income statement, consolidated statement of changes in equity and consolidated cash flow statement of the Group include the results of operations of the Company and its subsidiaries (except for the Acquired Group) for the years ended 31 December 2007 and 2008 or since the respective dates of incorporation, whichever is a shorter period, as if the current group structure had been in existent throughout the two years presented. The consolidated balance sheet of the Group as at 31 December 2007 and 2008 has been prepared to present the combined assets and liabilities of the Group as at those dates.

Intra-group balances and transactions and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised profits but only to the extent that there is no evidence of impairment.

Minority interests represent the portion of the net assets of subsidiaries attributable to interests that are not owned by the Group, whether directly or indirectly through subsidiaries, and in respect of which the Group has not agreed any additional terms with the holders of those interests which would result in the Group as a whole having a contractual obligation in respect of those interests that meets the definition of a financial liability. Minority interests are presented in the consolidated balance sheet within equity, separately from equity attributable to the equity shareholders of the Group. Minority interests in the results of the Group are presented on the face of the consolidated income statement as an allocation of the total profit or loss for the year between minority interests and the equity shareholders of the Group.

Where losses applicable to the minority exceed the minority interests in the equity of a subsidiary, the excess, and any further losses applicable to the minority, are charged against the Group's interest except to the extent that the minority has a binding obligation to, and is able to, make additional investment to cover the losses. If the subsidiary subsequently reports profits, the Group's interest is allocated all such profits until the minority's share of losses previously absorbed by the Group has been recovered.

The Group acquired the Acquired Group on 26 June 2007. The purchase method of accounting has been used to account for this acquisition.

(c) 呈列基準(續)

本集團的綜合損益表、綜合權益變動表及綜合現金流量表乃包括本公司及其附屬公司(被收購集團除外)截至二零零七年及二零零八年十二月三十一日止年度或自其各自註冊成立日期以來(以較短的期間為準)的經營業績,猶如現有集團架構於所呈報兩個年度一直存在。編製本集團於二零零七年及二零零八年十二月三十一日的綜合資產負債表,乃為呈列於該等日期本集團的合併資產及負債。

集團內公司間結餘及交易以及由集團內公司間交易產生的任何未變現利潤,會在編製財務報表時全數抵銷。因集團內公司間交易產生的未變現虧損會按未變現利潤的相同方式抵銷,但以沒有減值憑據者為限。

少數股東權益為並非由本集團直接或間接通過附屬公司擁有的應佔附屬公司資產淨值部份的權益,而本集團並無就此與該等權益的持有人協定任何額外條款,致使本集團整體就該等權益承擔符合財務負債定義的合約責任。少數股東權益於合併資產負債表內的權益項下與本集團權益股東應佔權益分開列示。本集團業績的少數股東權益乃在綜合損益表中列為年度利潤或虧損總額在少數股東權益及本集團權益股東之間的分配。

倘少數股東應佔的虧損超過其應佔附屬公司的權益,則超額部份及日後任何少數股東應佔虧損便須於本集團之權益中扣除,惟倘少數股東受責任約束及可以作出額外投資彌補虧損者除外。倘附屬公司其後錄得利潤,則所有該等利潤均會分配予本集團權益,直至收回以往由本集團承擔的少數股東應佔虧損為止。

本集團於二零零七年六月二十六日收購被收購集團。此項收購乃以購買會計方法處理。

2.**(a) Statement of compliance**

These financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. These financial statements also comply with the applicable disclosure provisions of the Listing Rules. A summary of the significant accounting policies adopted by the Group is set out below.

The HKICPA has issued the following new Interpretations and an amendment to HKFRSs that are first effective for the current accounting period of the Group and the company:

- HK(IFRIC) 11, *HKFRS 2 – Group and treasury share transactions*
- amendment to HKAS 39, *Financial instruments: Recognition and measurement*, and HKFRS 7, *Financial instruments: Disclosures – Reclassification of financial assets*

These HKFRS developments have had no material impact on the Group's financial statements as either they were consistent with accounting policies already adopted by the Group or they were not relevant to the Group's and the Company's operations.

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period (see note 34).

(b) Basis of preparation of the financial statements

The consolidated financial statements are presented in Renminbi ("RMB"), rounded to the nearest thousand, which is the functional and reporting currency of the Group. They are prepared on the historical cost basis except as otherwise stated in the accounting policies as set out below.

(d) Property, plant and equipment

The following items of property, plant and equipment are stated in the balance sheet at cost less accumulated depreciation and impairment losses (see note 2(g)(ii)):

- buildings held for own use which are situated on leasehold land, where the fair value of the building could be measured separately from the fair value of the leasehold land at the inception of the lease (see note 2(f)); and
- other items of plant and equipment.

The cost of self-constructed items of property, plant and equipment includes the cost of materials, direct labour, the initial estimate, where relevant, of the costs of dismantling and removing the items and restoring the site on which they are located and an appropriate proportion of production overheads.

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in the income statement on the date of retirement or disposal.

Depreciation is calculated to write-off the cost of items of property, plant and equipment, less their estimated residual value, if any, using the straight-line method over their estimated useful lives as follows:

- Buildings situated on leasehold land are depreciated over the shorter of the unexpired term of lease and their estimated useful lives, being no more than 50 years after the date of completion.
- Plant and machinery 10 years
- Other fixed assets 5 years

Both the useful life of an asset and its residual value, if any, are reviewed annually.

(d) 物業、廠房及設備

下列各項物業、廠房及設備乃按照成本扣除累計折舊及減值虧損(見附註2(g)(ii))於資產負債表中列賬:

- 持作自用而建於租賃土地上的樓宇,且其公平值在租賃(見附註2(f))開始時可與租賃土地的公平值分開計量;及
- 其他廠房及設備項目。

自建的物業、廠房及設備項目成本包括材料、直接勞工、初步估計(視何者適用)拆卸及清除項目及重修所在地盤之成本,以及生產經常費用的適當部份。

報廢或出售一項物業、廠房及設備所產生的損益以出售該項物業、廠房及設備所得款項淨額與其賬面金額之差額而釐定,並於報廢或出售當日在損益表確認。

折舊是根據各項物業、廠房及設備的估計可使用年限,以直線法除以其估計剩餘價值(如有)計算,以撇銷其成本值,詳情如下:

- 位於租賃土地之樓宇是按租賃未屆滿年期及其估計可使用年限之較短期間折舊,即竣工日期起計不多於50年。
- 廠房及機器 10年
- 其他固定資產 5年

資產之可使用年限及剩餘價值(如有)均會每年審閱。

(g) Impairment of assets

(i) *Impairment of trade and other receivables*

Trade and other receivables carried at cost or amortised cost are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. Objective evidence of impairment includes observable data that comes to the attention of the Group about one or more of the following loss events:

- significant financial difficulty of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the debtor will enter bankruptcy or other financial reorganisation; and
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor.

If any such evidence exists, the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of the asset), where the effect of discounting is material. This assessment is made collectively where financial assets carried at amortised cost share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through the income statement. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

(i) *應收貿易賬款及其他應收款項的減值*

以成本或攤銷成本列賬的應收貿易賬款及其他應收款項，於各結算日審議，以釐定是否存在客觀的減值證據，包括本集團得悉的有關下列一項或多項虧損事項的可觀察數據：

- 債務人遭遇重大財務困難；
- 違約，譬如拖欠或逾期還款。

2. (continued)

(g) Impairment of assets (continued)

(i) Impairment of trade and other receivables (continued)

Impairment losses are written off against the corresponding trade and other receivables directly, except for impairment losses recognised in respect of trade debtors whose recovery is considered doubtful but not remote. In this case, the impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against trade debtors directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in the income statement.

(ii) Impairment of other assets

Internal and external sources of information are reviewed at each balance sheet date to identify indications that the following assets may be impaired or an impairment loss previously recognised no longer exists or may have decreased:

- property, plant and equipment;
- construction in progress;
- prepayments for interests in leasehold properties classified as being held for an operating lease;
- investments in subsidiaries.

If any such indication exists, the assets' recoverable amounts are estimated.

2.

(continued)

(g) Impairment of assets (continued)

(ii) Impairment of other assets (continued)

- Calculation of recoverable amount
The recoverable amount of an asset is the greater of its net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash flows independently (i.e. a cash-generating unit).

- Recognition of impairment losses
An impairment loss is recognised in the income statement whenever the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amount of the other assets in the unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs to sell, or value in use, if determinable.

- 撥回
An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount.

A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to the income statement in the year in which the reversals are recognised.

2. 主要會計政策(續)

(g) 資產減值(續)

(ii) 其他資產減值(續)

- 可收回金額之計算
資產的可收回金額是其淨售價與使用價值兩者中的較高者。在評估使用價值時，估計未來現金流量會按可以反映當時市場對貨幣時間值及該資產獨有風險之除稅前貼現率，貼現至其現值。如果資產產生的現金流入基本上不能獨立於其他資產產生的現金流入，則以能夠獨立產生現金流入的最小資產組別(即現金產生單位)來釐定可收回金額。

- 確認減值虧損
當資產的賬面金額或所隸屬的現金產生單位超過其可收回金額時，減值虧損即於損益表內確認。就現金產生單位確認的減值虧損，將按比例分配至該單位(或一組單位)的其他資產，以削減該等資產的賬面金額，惟資產的賬面值不會低於其個別公平值減銷售成本或使用價值(如可釐定)。

- 撥回減值虧損
如釐定可收回金額的估計數字出現正面的變化，有鑒於此，

(h) Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost is calculated using the weighted average cost formula and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related

(l) Trade and other payables

Trade and other payables are initially recognised at fair value. Except for financial guarantee liabilities measured in accordance with note 2(o)(i), trade and other payables are subsequently stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

(m) Employee benefits*(i) Short term employee benefits*

Salaries, annual bonuses and staff welfare costs are accrued in the period in which the associated services are rendered by employees of the Group. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their fair values.

(ii) Contributions to defined contribution retirement plans

Contributions to local retirement schemes pursuant to the relevant labour rules and regulations in the PRC, Taiwan and Hong Kong are recognised as an expense in the income statement as incurred, except to the extent that they are included in the cost of inventories not yet recognised as an expense.

(iii) Share-based payments

The fair value of shares allotted and issued to employees is recognised as an employee cost to the extent that it exceeds the subscription cost with a corresponding increase in a capital reserve within equity. The fair value is measured at the grant date using the price to earning multiples valuation method, taking into account the terms and conditions upon which shares were allotted and issued. Where the employees have to meet lock-up conditions before becoming unconditionally entitled to the shares, the total estimated fair value of the shares over the subscription cost is spread over the lock-up period, taking into account the probability that the shares will continue to be held by the employees.

During the lock-up period, the number of shares that is expected to continue to be held by the employees is reviewed. Any adjustment to the cumulative fair value recognised in prior years is charged/credited to the income statement for the year of the review, unless the original employee expenses qualified for recognition as an asset, with a corresponding adjustment to the capital reserve.

(l) 應付貿易賬款及其他應付款項

應付貿易賬款及其他應付款項最初按公平值確認，除了財務擔保債項根據附註2(o)(i)計算外，應付貿易賬款及其他應付款項其後按攤銷成本入賬，惟若貼現影響並不重大，則按成本列值。

(m) 僱員福利*(i) 短期僱員福利*

本集團僱員提供相關服務期間，會產生薪金、全年花紅及僱員福利成本。若遞延處理有關付款或結算招致之影響屬重大，該等款項將按公平值列值。

(ii) 定額供款退休計劃之供款

根據中國、台灣及香港相關勞工規則及規例，就當地退休計劃作出的供款，除非包括於尚未確認為支出的存貨成本，否則，供款產生時於損益表確認為支出。

(iii) 以股份支付款項

向僱員配發及發行的股份的公平值乃確認為僱員成本，以超出認購成本為限，而權益內的資本儲備則相應增加。公平值於授出當日以市盈率估值法計算，並考慮配發及發行股份的條款及條件。倘僱員於無條件地有權獲授股份前須符合禁售條件，則超出認購成本的股份的估計總公平值在禁售期內攤分，並需考慮股份繼續由僱員持有的可能性。

(n) Income ta

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in the income statement except to the extent that they relate to items recognised directly in equity, in which case they are recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Apart from certain limited exceptions, all deferred tax liabilities and all deferred tax assets, to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the

(n) Income ta (continued)

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. Deferred tax assets and liabilities are not discounted.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

Additional income taxes that arise from the distribution of dividends are recognised when the liability to pay the related dividends is recognised.

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Company or the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

- in the case of current tax assets and liabilities, the Company or the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or
- in the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:
 - the same taxable entity; or
 - different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

(o) Financial guarantees issued, provisions and contingent liabilities

(i) Financial guarantees issued

Financial guarantees are contracts that require the issuer (i.e. the guarantor) to make specified payments to reimburse the beneficiary of the guarantee (the "holder") for a loss the holder incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Where the Group issues a financial guarantee, the fair value of the guarantee (being the transaction price, unless the fair value can otherwise be reliably estimated) is initially recognised as deferred income within trade and other payables. Where the fair value of the guarantee is not reliably measurable, the fair value of the guarantee is initially recognised as a liability at the fair value of the consideration received.

2.

(continued)

(p) Revenue recognition

Revenue is recognised when it is probable that the economic benefits associated with the transaction will flow to the Group and the revenue can be measured reliably.

(i) Sale of goods

Revenue from the sale of goods is recognised in the income statement when the significant risks and rewards of ownership have been transferred to the buyer. Revenue excludes value added tax and is after deduction of any trade discounts.

(ii) Services rendered

Revenue from services rendered is recognised in the income statement as and when the services are performed or rendered.

(iii) Interest income

Interest income is recognised in the income statement as it accrues using the effective interest method.

(iv) Government grants

Government grants are recognised in the balance sheet initially when there is reasonable assurance that they will be received and that the Group will comply with the conditions attached to them. Grants that compensate the Group for expenses incurred are recognised as revenue in the income statement on a systematic basis in the same periods in which the expenses are incurred. Grants that compensate the Group for the cost of an asset are recognised in the income statement over the useful life of the asset.

(v) Rental income from operating leases

Rental income receivable under operating leases is recognised in the income statement in equal instalments over the periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the use of the leased asset. Lease incentives granted are recognised in the income statement as an integral part of the aggregate net lease payments receivable.

(q) Translation of foreign currencies

Foreign currency transactions during the year are translated into RMB at the exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated into RMB at the exchange rates ruling at the balance sheet date. Exchange gains and losses are recognised in the income statement.

Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the foreign exchange rates ruling at the transaction dates. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated into RMB at foreign exchange rates ruling at the dates the fair value was determined.

The results of foreign operations are translated into RMB at the exchange rates approximating the foreign exchange rates ruling at the dates of the transactions. Balance sheet items are translated into RMB at the foreign exchange rate ruling at the balance sheet date. The resulting exchange differences are recognised directly in a separate component of equity.

On disposal of a foreign operation, the cumulative amount of the exchange differences in equity which relate to that foreign operation is included in the calculation for the profit or loss disposal.

(r) Borrowing costs

Borrowing costs are expensed in the income statement in the period in which they are incurred, except to the extent that they are capitalised as being directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial period of time to get ready for its intended use or sale.

The capitalisation of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. Capitalisation of borrowing costs is suspended or ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are interrupted or complete.

- (iii) the party is an associate of the Group or a joint venture in which the Group is a venturer;
- (iv) the party is member of key management personnel of the Group or the Group's parent, or a close family member of such an individual, or is an entity under the control, joint control or significant influence of such individuals;
- (v) the party is a close family member of a party referred to in (i) or is an entity under the control, joint control or significant influence of such individuals; or
- (vi) the party is a post-employment benefit plan which is for the benefit of employees of the Group or of any entity that is a related party of the Group.

Close family members of an individual are those family members who may be expected to influence, or be influenced by, that individual in their dealings with the entity.

(t) Segment reporting

A segment is a distinguishable component of the Group that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

The Group's operations are regarded as a single business segment, being an entity engaged in the trading of, manufacturing of and provision of processing services for polysilicon and solar silicon monocrystalline ingots/wafers. In addition, the Group's turnover and operating profit are almost entirely derived from its operations in the PRC. Accordingly, no analysis by geographical segment has been presented.

(s) 關連方

就本財務報表而言，下列的另一方被視為本集團關連方：

- (i) 該另一方能夠透過一個或多個中介機構直接或間接控制本集團或對本集團的財務及經營政策決策發揮重大影響力，或共同控制本集團；
- (ii) 本集團及該另一方受到共同控制；
- (iii) 該另一方為本集團之聯營公司或本集團為合營方之合營企業；
- (iv) 該另一方為本集團或本集團母公司之主要管理人員、或該等個別人士關係密切之家族成員、或受該等個別人士控制、共同控制或重大影響之實體；
- (v) 該另一方為與(i)所指之一方關係密切之家族成員或受該等個別人士控制、共同控制或重大影響之實體；或
- (vi) 該另一方為以本集團或屬本集團關連人士實體之僱員為受益人之終止受僱後福利計劃。

與個別人士關係密切之家族成員指預期可影響該個別人士與該實體交易之家族成員，或受該個別人士與該實體交易影響之家族成員。

(t) 分部報告

分部是指本集團可明顯區分的組成部分，其為提供產品或服務(業務分部)，或在特定經濟環境中提供產品或服務(地區分部)，並且承擔不同於其他分部的風險及回報。

本集團的業務被視作單一業務分部，即從事多晶硅及太陽能單晶硅錠、硅片的貿易、製造及提供加工服務的實體。此外，絕大部分本集團的營業額及經營利潤均來自其於中國的業務，故此，並無呈列區域分部的分析。

The first year that inzhou Huachang Silicon Materials Co., Ltd. ("Huachang"), inzhou Huari Silicon Materials Co., Ltd. ("Huari") and inzhou Youhua New Energy Co., Ltd. ("Youhua") recorded assessable profits was 2003, 2005 and 2005, respectively. Accordingly, Huachang, Huari and Youhua were subjected to a preferential tax rate of 13.5% for the year ended 31 December 2007.

The first year that inzhou Yangguang Energy Co., Ltd. ("Yangguang") recorded assessable profits was 2006. It was fully exempted from PRC EIT for the year ended 31 December 2007.

Shanghai ingji Electronic Materials Co., Ltd. ("ingji") was subject to a preferential tax rate of 27% for the year ended 31 December 2007.

On 1 January 2008, the Corporate Income Tax ("CIT") Law of the PRC ("New CIT Law") became effective. The PRC CIT rate has been adjusted to a standard rate of 25%. For Foreign Investment Enterprises ("FIE"s) which have not fully utilised their five-year tax holiday (i.e. two-year exemption and subsequent three-year 50% reduction of the applicable tax rate) will be allowed to continue to receive the benefits of the tax holiday during a five-year grandfathering period. For those FIEs which have not yet begun their five-year tax holiday period, the tax holiday period will be deemed to have commenced from the effective date of the New CIT Law.

Further under the New CIT Law, from 1 January 2008 onwards, non-resident enterprises without an establishment or place of business in the PRC or which have an establishment or place of business but the relevant income is not effectively connected with the establishment or a place of business in the PRC, are subject to withholding tax at the rate of 5% or 10% on various types of passive income such as dividends derived from sources in the PRC. Distributions of pre-2008 earnings are exempted from the above-mentioned withholding tax.

There was no change in the number of shares allotted and issued from the date of grant to 31 December 2008.

(ii) *Fair value of shares and assumptions*

The fair value of services received in return for shares allotted and issued is measured by reference to the fair value of shares granted. The estimate of the fair values of the shares granted during the year ended 31 December 2007 is measured at the grant date using the price to earnings multiple valuation method. The valuation is derived from applying (i) an expected price to earnings multiple of a group of listed companies operating in comparable businesses, adjusted for the uniqueness of the subject being valued; and (ii) the net profit, excluding non-operating income and expenses, of the Acquired Group with appropriate adjustments.

*Fair value of shares and assumptions***股份的公平值及假設**

(f) Capital management

The Group's primary objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, by pricing products and services commensurately with the level of risk and by securing access to finance at a reasonable cost.

At 31 December 2008, the Group had short-term bank loans amounting to RMB214,580,000 (2007: RMB127,000,000) which are repayable within one year and a municipal government loan of RMB3,003,000 (2007: RMB2,890,000) which will be fully repaid by 2020. The gearing ratio, representing the ratio of total borrowings to the total share capital and reserves of the Group was 17.2% at 31 December 2008 (2007: 20.5%). The Group had cash and bank deposits as at 31 December 2008 amounting to RMB295,473,000 (2007: RMB349,098,000).

(d) Foreign currency risk

The Group is exposed to foreign currency risk primarily through sales and purchases and cash and bank deposits that are denominated in a currency other than the functional currency of the operations to which they relate. The currencies giving rise to this risk are primarily the United States Dollar and the Hong Kong Dollar. The Directors do not expect any significant impact from movements in exchange rates since the Group uses the foreign currencies collected from customers to settle the amounts due to suppliers. In addition, the Directors ensure that the net exposure is kept to an acceptable level by buying or selling the United States Dollar at spot rates where necessary to address short-term imbalances.

(i) Exposure to currency risk

The following table details the Group's and the Company's exposure at the balance sheet date to currency risk arising from recognised assets or liabilities denominated in a currency other than the functional currency of the entity to which they relate.

(d) 外匯風險

本集團承受的外幣匯兌風險，主要來自與業務相關功能貨幣以外貨幣計值之銷售及採購。產生此等風險之貨幣主要為美元及港元。董事並不預期匯率變動會對本集團造成任何重大影響，因為本集團使用自客戶收回之外幣向供應商支付款項。此外，當有需要時，董事在需要時可藉著按即期匯率買入及賣出美元解決短期失衡，以確保淨風險維持於可接受水平。

The sensitivity analysis has been determined assuming that the change in foreign exchange rates had occurred at the balance sheet date and had been applied to the Group's exposure to currency risk for all financial instruments in existence at that date, and that all other variables, in particular interest rates, remain constant.

The stated changes represent changes in foreign exchange rates over the period until the next annual balance sheet date. In this respect, it is assumed that the pegged rate between the Hong Kong Dollar and the United States Dollar would be materially unaffected by any changes in movement in value of the United States Dollar against other currencies. The analysis has been performed on the same basis for 2007.

(e) Supply of raw materials risk

The Group's revenue depends significantly on its ability to obtain sufficient raw materials which meet the Group's specifications. The Group obtains most of its raw materials from a limited number of suppliers. As a result, there is a risk that the Group will be unable to secure a sufficient supply of raw materials to meet its planned production output, which may have a material and adverse impact on the revenue of the Group.

(f) Fair values

All financial instruments are carried at amounts not materially different from their fair values as at 31 December 2007 and 2008.

In determining the carrying amounts of certain assets and liabilities, the Group makes assumptions of the effects of uncertain future events on those assets and liabilities as at the balance sheet date. The Group's

2008

Up to the date of issue of the financial statements, the HKICPA has issued a number of amendments, new standards and interpretations which are not yet effective for the year ended 31 December 2008 and which have not been adopted in these financial statements.

The Group is in the process of making an assessment of what the impact of these amendments, new standards and new interpretations is expected to be in the period of initial application.

So far it has concluded that the adoption of them is unlikely to result in a significant restatement of the Group's or the Company's results of operations and financial position.

In addition, the following developments are expected to result in amended disclosures in the financial statements, including restatement of comparative amounts in the first period of adoption:
